DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, and 48-58, drawn to spread spectrum system, classified in class 375, subclass 130.
 - II. Claims 38-47, and 59-63, drawn to a radar detector for a tag, classified in class 340, subclass 573.1.
 - III. Claims 64-77, drawn to a system for separation warning by reduction in detected signal strength, classified in class 340, subclass 539.21.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed Group I does not require the particulars of the subcombination as claimed in Group II. The subcombination has separate utility such as a detector comprising a receiver for receiving from the tag a spread spectrum signal based on a Gold or Kasami code features of Group II.
